He is holder of a PhD and M.Sc in Chemistry from Kenyatta University and a First Class Honors Bachelor of Education (Science) degree from Moi University. He is a lecturer of Chemistry in the Department of Biological and Physical Sciences and also the Dean, School of Science and Technology at Turkana University College. He is highly creative and motivated Environmental/Physical Chemist involved in the study of levels of essential trace elements in food substances and water, heavy metals in environmental samples, water remediation techniques using locally available materials, pesticide analysis, Environmental analysis of air-indoor and outdoor, lake-, river and well water, Development of analytical methods for determination of trace elements as well as sewage analysis of pharmaceuticals and heavy metals. He is a member of Kenya Chemical Society (KCS) and Kenya Association of Food Safety and Protection (KAFSAP). He has vast experience in training teachers and preparing students for science fair having been a judge for many years. He has experience working in a matrixed environment, with proven project management experience and excellent communication skills Leadership ability, initiative, and sound judgment, the ability to prioritize under pressure and adapt to changing demands, and the ability to make rapid progress against goals despite tight timelines are critical skills. His aspiration in life is to be part of a team committed to the development of human capacities for self-reliance and determination through training, research, mentorship and motivation. I aim to use my wide experience and expertise in university level teaching, conducting applied research, mentoring and motivating. Over the last twelve (12) years at the University, he has published several peer-reviewed articles and participated in conferences
